

The Fast-Track

NO SCALE-UP—maintain 2013 coverage levels

RAPID SCALE-UP—achieve ambitious targets

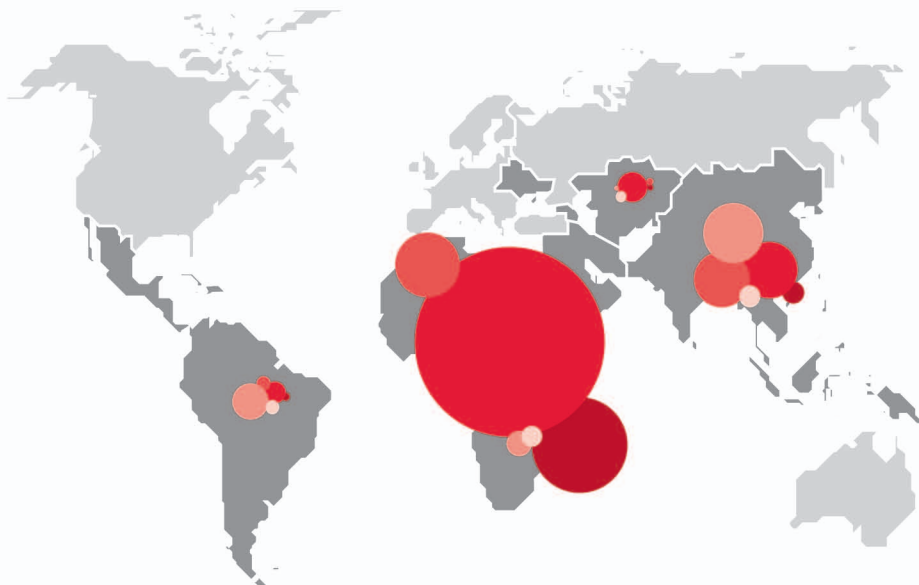

New HIV infections in low- and middle-income countries (millions)

AIDS-related deaths in low- and middle-income countries (millions)

New HIV infections in different population groups, low- and middle-income countries, 2030

- Children
- Heterosexual (including young women, excluding sex work)
- Female sex workers and their clients
- Men who have sex with men
- People who inject drugs

MAJOR BENEFITS:

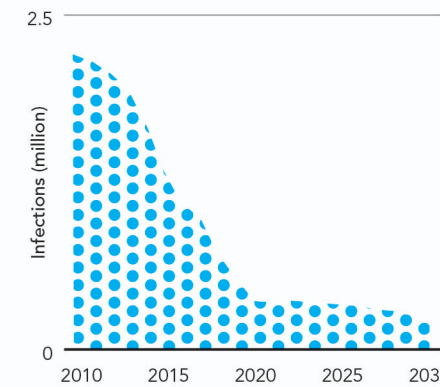

21 MILLION
AIDS-related deaths averted by 2030

28 MILLION
HIV infections averted by 2030

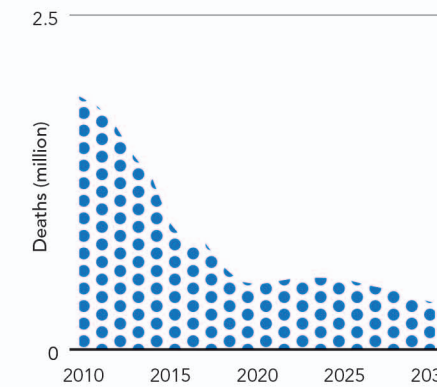

5.9 MILLION
infections among children averted by 2030

15-FOLD
return on HIV investments

New HIV infections in low- and middle-income countries (millions)

AIDS-related deaths in low- and middle-income countries (millions)

New HIV infections in different population groups, low- and middle-income countries, 2030

- Children
- Heterosexual (including young women, excluding sex work)
- Female sex workers and their clients
- Men who have sex with men
- People who inject drugs

Without scale-up, the AIDS epidemic will continue to outrun the response, increasing the long-term need for HIV treatment and increasing future costs.

Rapid scale-up of essential HIV prevention and treatment approaches will enable the response to outpace the epidemic.
