

Due to organizational restructuring, the National Programme for HIV/AIDS is now the Portuguese governmental representative for the HIV Infection.

The Director of the National Programme for HIV/AIDS, Dr. Antonio Diniz, was appointed in March 9th 2012, and is the focal point in this area.

The data related to the topics hereunder was reported by the Portuguese hospitals, concerning the period of January 1st 2010 to December 31st 2011:

CORE INDICATORS FOR GLOBAL AIDS RESPONSE PROGRESS REPORTING

- 3.1. – Prevention to mother-to-child transmission
- 3.2. – Early infant diagnosis
- 4.1. – HIV treatment antiretroviral therapy
- 4.2. – Twelve month retention on antiretroviral therapy
- 5.1. – Co-management of tuberculosis and HIV treatment

NATIONAL FUNDING MATRIX 2012

- 1.22 – Post-exposure prophylaxis
- 2.01.02 – Opportunistic infection (OI) outpatient prophylaxis and treatment
- 2.01.03 – Antiretroviral therapy
- 2.01.06 – Dental programmes for PLHIV
- 2.02.01 – Inpatient treatment of opportunistic infections (OI)
- 2.02.02 – Inpatient palliative care

For a total of 39 inquired hospitals, 26 reported their values (66,7%).

Some of the most important units of HIV treatment did not report on time. This fact explains the difference between the amounts reported in the NATIONAL FUNDING MATRIX 2012 and the real amount dedicated to HIV treatment in Portugal. For example, the total amount spent on antiretroviral treatment in 2010 was € 230.000.000,00.
