

I am a migrant. I face these issues.

I am HIV-positive and
I have no access to
treatment

I have no access
to HIV-related
information

Away from my family
I visit sex workers
but no condoms are
available

I am unable to
find a doctor who
understands me

I do not understand
the language spoken
where I now live

I was forced to
leave my country
because of my sexual
orientation

My employer took
away my passport and
forces me to have sex

I need to send all
my earnings home
to my family

Who is looking
after my family
while I am gone?

I do not know
what my rights
are here

I fear being
deported if I test
positive for HIV

My new neighbours
do not like
foreigners
